Goodness From Ayvalik

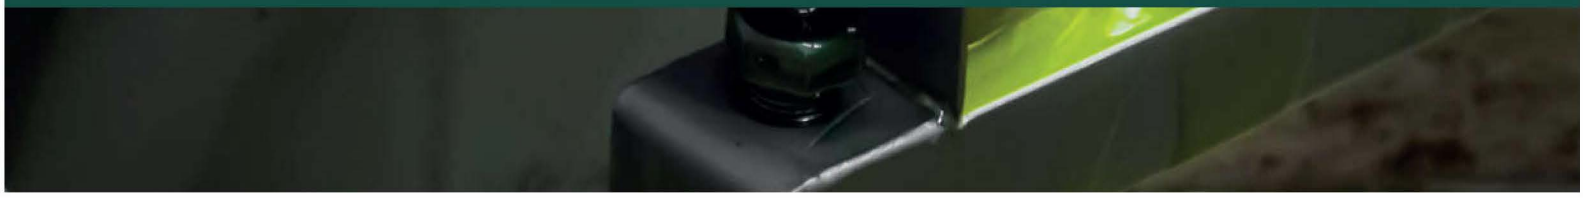

We take care of our olive trees like our eyes and harvest them respectfully and meticulously.

Olive and olive cultivation is our profession and tradition.

Our traditional stone-press olive oil production facility and modern continuous-system olive oil production facility have a daily olive pressing capacity of 150 tons.

We preserve the olive oil with best way in our facility with a storage capacity of 3000 tons, and protect them against light and heat inside stainless steel tanks.

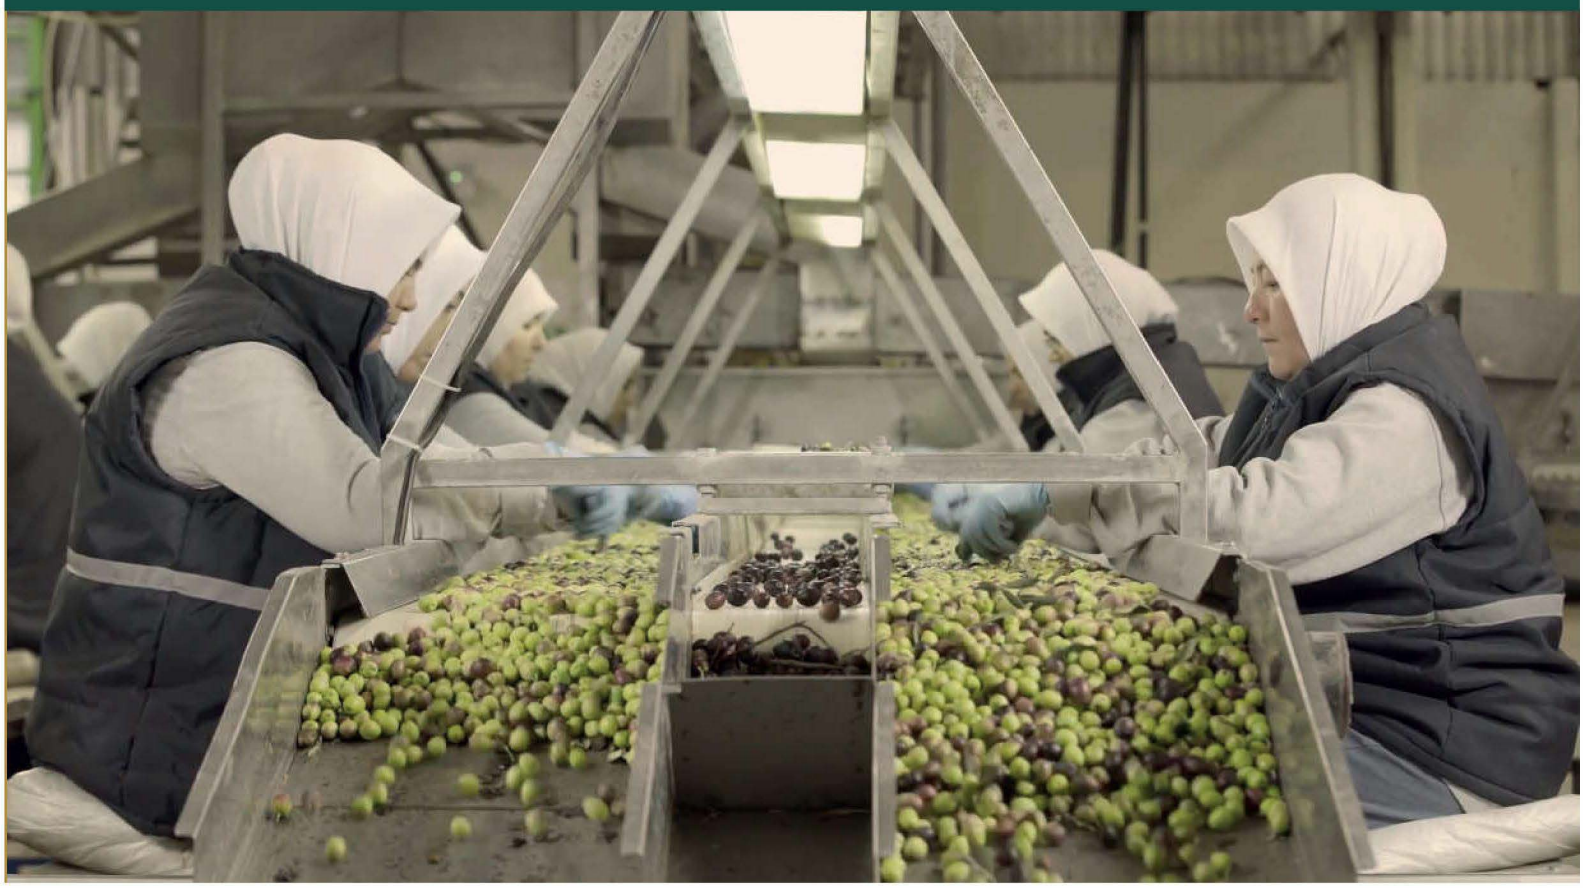

We supply our domestic and international orders without interruption in our filling machine park with a daily filling capacity of 60 thousand bottles at our modern olive oil filling facility.

1000 tons of table olives are completely produced with natural methods in our facility and delivered to our customers at homeland and at abroad.

Quality and food safety are maintained at the highest level by our food and chemical engineers at our facility possessing ISO 9001 and ISO 22000.

We export to many European and Far East countries in addition to our distributors in England and Hong-Kong, and we also supply products to other export-companies.
