COMPANY HISTORY

2019

The creation of ART BRAZIL EXPORT was inspired by the innovative DNA of its original founders and investors. Based on 20 years of experience as market leaders, the company evolves to a new level, by providing the best services to export sugar, soybean, and diverse Brazilian food products, to international clients worldwide.

1999

Since its foundation, ART BRAZIL FOODS was a strategic supplier of sugar and grains, working in partnership with several mills and cooperatives to provide good quality food products to the biggest Brazilian import-export companies.

ART BRAZIL is specialized in the distribution of a large selection of Brazilian food products, including sugar, meat, fruit pulps, juices and dairy, and also others like wood and metals. The company can satisfy small to large demand, offering healthy alternatives of natural products at an extremely competitive price, with the most secure solutions for payment and transportation.

If you'd like represent ART BRAZIL at any given market, please [click here](#) to become a part of our sales force.

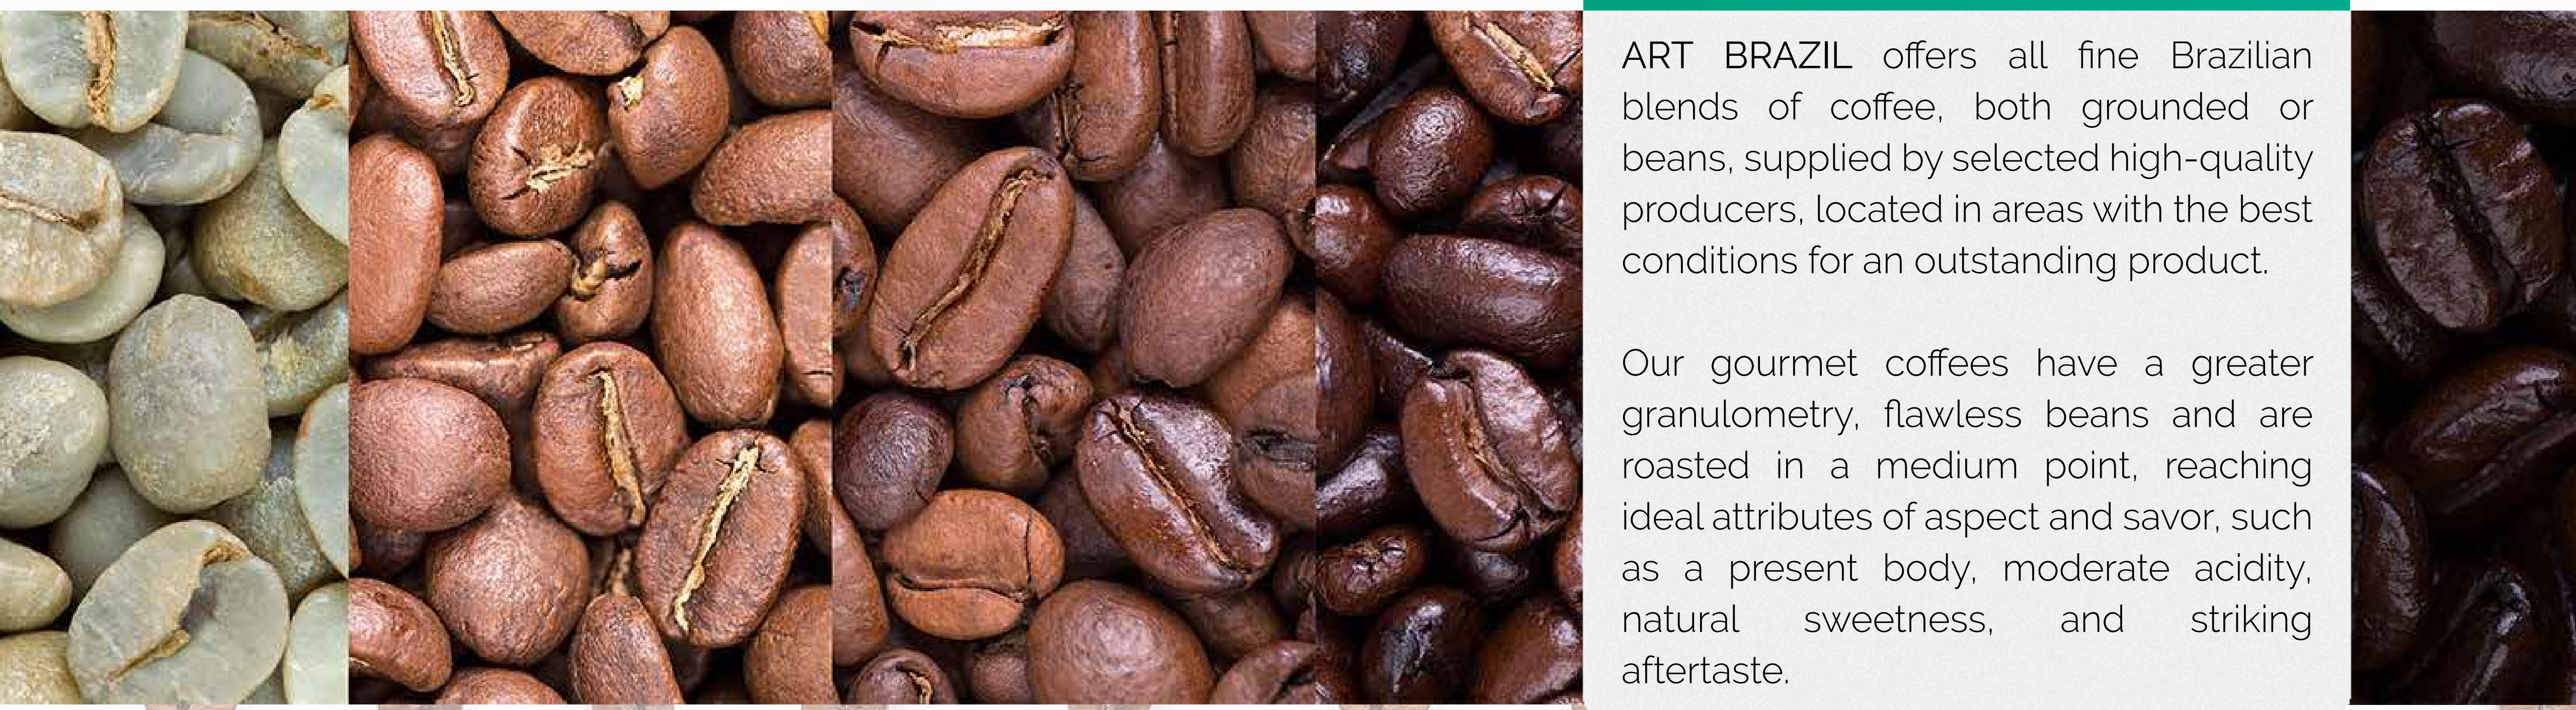

COFFEE

WE HAVE ALL FINE
QUALITY COFFEE BLENDS

ART BRAZIL offers all fine Brazilian blends of coffee, both grounded or beans, supplied by selected high-quality producers, located in areas with the best conditions for an outstanding product.

Our gourmet coffees have a greater granulometry, flawless beans and are roasted in a medium point, reaching ideal attributes of aspect and savor, such as a present body, moderate acidity, natural sweetness, and striking aftertaste.

YELLOW CORN

WE WORKS WITH THE PRODUCT
FOR HUMAN CONSUMPTION

The production cycle of maize culture begins with market analysis, in which the area are to be grown is defined. Subsequently, crops and all planning and the execution of necessary agricultural activities are defined.

After harvested, the corn grain is stored on the farm until it is sold to customers in the domestic and foreign markets. The final destination of corn is as the main energy component of feed for poultry, pigs and cattle, in the meat production process, intended for human consumption.

Only a smaller portion of the produced corn volume is used directly in the human diet, such as flours, oils, sweeteners, pasta and biscuits, among other foods in which corn is a component.

HARVEST

Corn is harvested during the months of June and July on farms that have a 2nd crop. The machines used are the same ones that perform the grain harvest, changing only the ear collecting platform.

PROCESSING AND STORAGE

Begins with receipt at the warehouse, followed by pre-cleaning of the grain, drying, storage and subsequent dispatch of the stored grain.

RICE

FOOD CONSUMED
WORLDWIDE

We Art Brazil Alimentos LTDA. main seller with legal and corporate responsibility, report that what we are ready.

Willing and able to provide, "white rice 5% broken" according to the terms, conditions and procedures.

Free from Insects and Molds	

SOYA

GMO SOYA BEANS

Composed of 44% soybean, GMO is an important source of protein, mainly used to feed farm animals. It represents two-thirds of the total world output of protein feedstuffs, including all other major oil meals and fish meal.

Its feeding value is unsurpassed by any other plant protein source and it is the standard to which other protein sources are compared (Cromwell, 1999). While it has been an accepted part of livestock and poultry diets in the USA since the mid-1930s, soybean feed production took off in the mid-1970s and then accelerated in the early 1990s due to a growing demand from developing countries.

The expansion of aquaculture and prohibitions on the feed use of slaughterhouse by-products have also fueled the demand for this high-quality source of protein.

Soybean meal is the by-product of the extraction of soybean oil. Several processes exist, resulting in different products. It is usually classified for marketing by its crude protein content. High-protein types are obtained from dehulled seeds and contain 47-49% protein and 3% crude fiber (as fed basis).

Other types of soybean meal include the hulls or part of the hulls and contain less than 47% protein and more than 6% crude fiber. In solvent-extracted soybean meals, the oil content is typically lower than 2% while it exceeds 3% in mechanically extracted meals.

SUGAR

SUPPLY CHAIN PHILOSOPHY
TO OTHER GOODS

Art Brazil supplies the following types of sugar:

- ICUMSA SUGAR 45
- ICUMSA SUGAR 150
- ICUMSA VHP 600-1200 Sugar
- Organic A-400 and
- A-600

We attend minimum order is 100 TONS (MT) in container
SPOT: 12,500 MT

For one year contracts minimum 150.000 MT in 12 shipping of MT maximum availability of 1.2000.000 MT in 12 monthly shipments of 100.000 MT

ICUMSA 45, 100, 150 VHP. 600-1,200 and 800-1,200

White sugar cane ICUMSA 150 = Multiples of 12,500 MT, or sugar in containers.

Cane sugar ICUMSA 600/1200 VHP = multiples of 12,500 MT, or sugar in containers.

CHEESE

NATURAL PRODUCTS IN PARTNERSHIPS
WITH SEVERAL BRAZILIAN DAIRY

Tropical Type Cheese

The Tropical Cheese is similar to Parmesan Cheese, in aspect and taste. It differs in maturation time; whereas the mandatory maturation period required by the supervisory body for Parmesan is 6 months, the Tropical type requires 15 days. Typical of the northern region of the state of Minas Gerais, the Tropical Cheese has the following sensory characteristics:

- Consistency: medium to hard;
- Texture: closed, brittle and grainy;
- Color: yellowish-white;
- Flavor: Slightly Spicy;
- Odor: Characteristic;
- Crust: Irregular;
- Shape: cylindrical or rectangular (blocks)
- Weight: 4 to 10 kg.

FRESH SMOKED PROVOLONE CHEESE

This cheese is produced in the Northern region of Minas Gerais State

Technical information

GRUYERE

BUTTER

NATURAL PRODUCTS IN PARTNERSHIPS
WITH SEVERAL BRAZILIAN DAIRY

Butter is composed of cow's milk fat that has been separated from other components. It has a rich flavor and is widely used, worldwide. Saturated fat is not harmful to health and many people already recognize butter as an extremely healthy food.

Butter contains a huge variety of micronutrients. The following vitamins are found in butter:

Vitamin A: It is the most abundant vitamin in butter. One tablespoon (14g) can provide about 11% of the recommended daily allowance.

Vitamin B12: Also called cobalamin, is only found in foods of animal origin, such as eggs, meat and dairy products.

Vitamin E: Is a powerful antioxidant, often found in fatty foods.

Vitamin K2: A form of vitamin K, also called menaquinone. It can protect against cardiovascular disease and osteoporosis.

- 20 units of 50 grams;
- 16 units of 63 grams;
- 14 units of 72 grams;
- 12 units of 83 grams;
- 11 units of 90 grams;
- 10 units of 100 grams.

Conservation: Keep frozen at -12°C.
Validity: 360 days.

CHICKEN CHEESE BREAD

We offer cheese bread with chicken filling in two variations of quantities and weight of breads, all in packages of 3 kilos, containing approximately:

- 120 units of 25 grams;
- 36 units of 83 grams.

Conservation: Keep frozen at -12°C.
Validity: 360 days.

SWEET GUAVA BREAD

We offer cheese bread with sweet guava filling in two variations of quantities and weight of breads, all in packages of 3 kilos, containing approximately:

- 120 units of 25 grams;
- 36 units of 83 grams.

Conservation: Keep frozen at -12°C.
Validity: 360 days.

CHEESE BREAD

AUTHENTIC BRAZILIAN FROZEN
CASSAVA, CHEESE BREAD

CREAM CHEESE FILLED CHEESE BREAD

We offer cheese bread with curd filling in two variations of quantities and weight of breads, all in packages of 3 kilos, containing approximately:

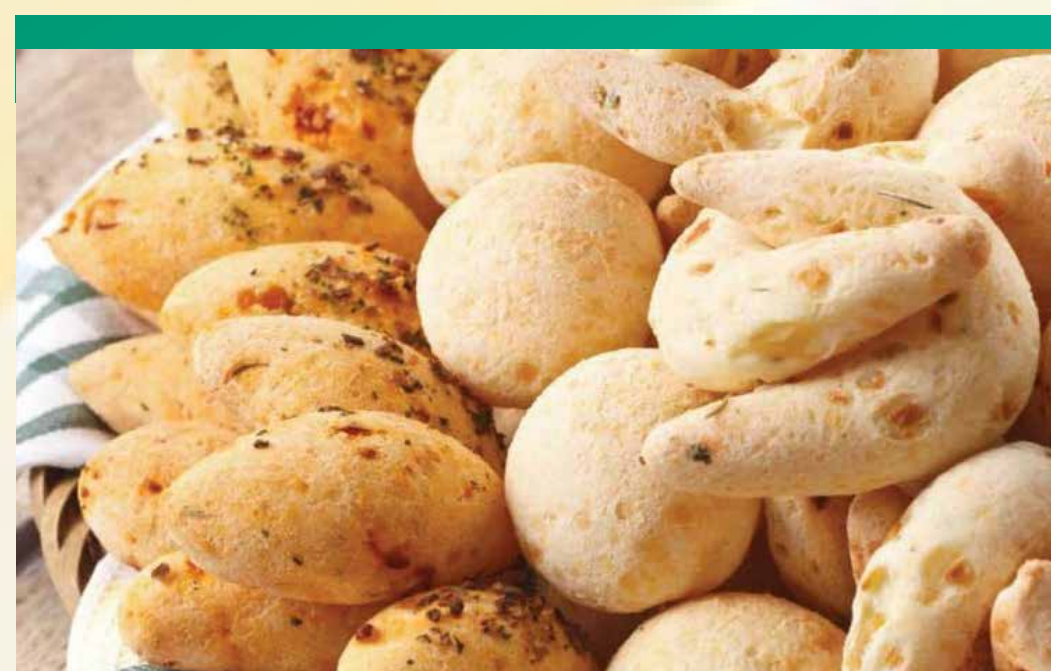

- 120 units of 25 grams;
- 36 units of 83 grams.

Conservation: Keep frozen at -12°C.
Validity: 360 days.

CHIPA

We offer this product in a 3 kilos packaging, containing approximately 60 units of 50 grams.

Conservation:
Keep frozen at -12°C.
Validity: 360 days.

- Cheese breads are conditioned in transparent packages, featuring technical information;
- One box contains, 4 packs of 3 kg, each one, but we can do it according to the need of the buyer;
- It must not be stored in refrigeration islands;
- Our products are packed in cardboard shipping boxes, a material suitable for the correct transportation and storage of the product;
- We use refrigerated trucks to transport the products and guarantee that they are delivered in the best conditions of hygiene and freshness;
- Delivery dates vary depending on the delivery route and can be done weekly or fortnightly.

AÇAÍ

FROZEN AÇAÍ BERRY, PURE OR INGREDIENT

ART BRAZIL is a trusted supplier for the best Açai pulp to the food industry. Our Açai pulp has a superior flavor profile, smaller particle size and higher antioxidant values ORAC (Oxygen Radical Absorbance Capacity). We offer standard A Açai, a special designation from the Brazilian Department of Agriculture, which certifies that our product has a higher percentage of Açai.

ART BRAZIL provides a variety of portion options, perfect to be served in restaurants and make juices or smoothies.

TRADITIONAL AÇAÍ

Case weight

6 kg/13.22 lbs net

FRUIT POWDER

DEHYDRATED AND LYOPHILIZED FRUIT

Dehydrated and lyophilized fruit powder

Freeze-dried fruit powder is a process where frozen raw materials are placed in a refrigerated vacuum system and, without thawing, are dehydrated—the ice in the product is sublimated into water vapor. During the freeze-dried process, cell structure remains intact. The freeze-dried product also retains the color, shape, flavor, and nutritional value of the original raw material better than other drying methods. Our freeze dried fruit powder is available in bulk quantities.

Applications: Confections, candy fillings, dessert and bakery mixes, breakfast cereals, snack mixes and stand-alone snacks.

- Products are subject to season availability

Açaí freeze dried-powder organic

Açaí powder is made from a berry harvested from a native Amazonian palm tree. These dark purple berries are very high in anthocyanins, which are antioxidants that protect the body against free radical damage.

Açaí powder also contains Omega 6 and 9, aminoacids, dietary fiber and phytosterols, and has been valued as a superfruit that contains significant amounts of nutrients and supports the normalization of health and wellbeing, boosts energy and strengthens the immune system, which is why it has recently become a dietary sensation.

Applications: Confections, candy fillings, dessert and bakery mixes, breakfast cereals, snack mixes and stand-alone snacks.

GUARANA POWDER

POWERFUL NATURAL ANTIBIOTIC

The guarana fruit is rich in caffeine. It is widely used to produce powders, syrups, soft drinks and bars, with stimulating properties.

Other than caffeine, guarana is composed of calcium, phosphorus, iron, vitamin A, starch, catechin, potassium, sugars, tannins, theophylline, theobromine, proteins and thiamine.

Soluble powder is the best way to benefit from all the healthy properties of guarana. The powder can be dissolved in water, juice, or milk. Guarana is slowly absorbed by the body, resulting in a sustained level of energy and alertness.

- Perfect as a preworkout supplement 
- An effective appetite suppressant, ideal for those losing weight
- Rich in saponins and tannins, which have antioxidant properties

Proven Benefits

Due to its high concentration of caffeine - higher than any other product, including coffee, guarana provides physical and mental alertness, working as a great stimulant.

Properties

Astringent;
Aphrodisiac;
Analgesic;
Antibacterial;
Diuretics;
Energetics;
Invigorating;
Tonic.

MINERAL WATER

QUALITY CERTIFICATION BY NATIONAL
AND INTERNATIONAL BODIES

Our water has a strict quality policy, which accompanies the process from its extraction to the supply of inputs, to provide all consumers with security.

Extraction: Water is captured at a depth of 120 meters by means of food-grade stainless steel pumps. All piping traversed by water is also made of food grade stainless steel and the seals are made of non-toxic silicone suitable for the food industry. There are particle retention filters before and after the reservoir.

Blow: Preforms made with virgin resin are used. The bottles are blown internally and, subsequently, directed to filling.

In-house laboratory with the most advanced structure. Physical-chemical analysis of the product

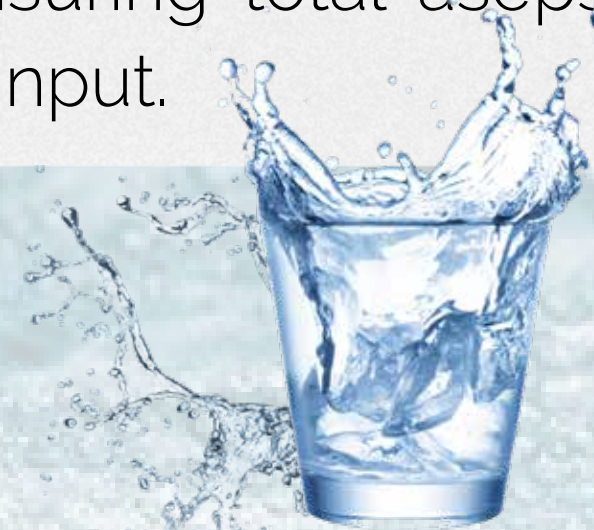

- PH around 7, ideal for the human body;
- Low Sodium;
- Low Bicarbonate;
- Low concentration of minerals

Filling: The equipment is all automated, not allowing manual contact. The bottles are rinsed (blasted) with natural mineral water, pressurized by a foodgrade stainless steel pump, and, subsequently, they are automatically filled and sealed inside the same machine. This process takes place in exclusive filling rooms with positive pressure, making the interior sterile.

Buffering: The storage rooms of the lids have positive pressure, filtered air and ultraviolet lamps, ensuring total asepsis of the place and the input.

Sterilization: The sterilization of the pipes is performed periodically, with the most advanced technology, leaving no residues harmful to health and the environment.

Suppliers: The choice of input suppliers is carried out according to a procedure required by Resolution RDC n° 275, of October 21, 2002, which provides for the Technical Regulation of Standardized Operating Procedures applied to Food Producing / Industrializing Establishments, which states that only rated and qualified companies can supply products. In addition, the suppliers of inputs (preforms, caps and labels) are market leaders and have internationally recognized quality and procedure certifications.

CACHAÇA

MOST POPULAR AMONG DISTILLED ALCOHOLIC BEVERAGES IN BRAZIL

Cachaça is a distilled spirit made from fermented sugarcane juice. Also known as aguardente, pinga, caninha, marvada and other names.

Outside Brazil, cachaça is used almost exclusively as an ingredient in tropical drinks.

- 1 bottle of cachaça Art Brazil Pure
- 1 dishware with recipe
- 10 dosages of sugar
- 1 tropical type wood socket
- 10 toothpicks plastic macaw
- 1 bag with logo to store

HONEY

ORGANIC PRODUCTION, RESPECTING
SUSTAINABLE CULTIVATION

Honey is a food that all mankind has known since the beginning of civilization. It is a mythical food, with healing and nutritional virtues. Honey appears as one of the main ingredients in natural medicines against numerous diseases.

Honey is closely linked to human longevity, due not only to its high energetic action, but mainly to the presence of enzymes, vitamins and essential elements, that improve the functioning of the body, which is highly appreciated by ortho-molecular medicine.

Its color and flavor are related to the predominance of the flowering used for its production. Light-colored honeys have a milder taste and aroma, such as those produced in orange groves, which have a high market price. On the other hand, dark colored honeys are more nutritious, being richer in proteins and minerals.

ART BRAZIL supplies only organic honey, coming from sustainable cultivation that apply eco-friendly techniques. We buy, process and package the honey we sell to industries, supermarkets, grocery stores, bakeries and natural products stores.

The most consumed types of honey are:

- Orange Flower Honey
- Eucalyptus Honey
- Grape Honey
- Wild Flower Honey
- Honey From Jataí

Honey's sweet taste makes it a great substitute for sugar. As it is rich in carbohydrates, it is a quick source of energy.

Health benefits from honey:

- Throat
- Intestine
- Respiratory tract
- Skin
- Urinary infection
- Sleep

Contraindications: Honey is not recommended to children under one year of age. It is also contraindicated in case of diabetes, due to its high amount of sugar.

Propolis is a resinous natural substance produced by bees. Its color, flavor and aroma depend on its botanical origin.

Propolis is a natural antibiotic, used to prevent inflammation, treat wounds, and heal throat infections. Studies also indicate efficient action of some of its active compounds as immune stimulator and antitumor action.

The efficiency of propolis goes far beyond popular belief. It is scientifically proven to be rich in substances of interest to the human organism, among which we highlight flavonoids and phenolics.

These compounds cause propolis to have an antioxidant and anti-inflammatory effect, slowing cell aging, improving wound recovery and fighting microorganisms by increasing the body's immunity.

Experts say that propolis can and should be used to treat the most diverse diseases and infections. For being bacteriostatic and bactericidal, it immobilizes and kills bacteria. The use of propolis sprays is common in mild throat or laryngeal infections and irritations.

ART BRAZIL has bee-boxes located in a privileged region of native field rosemary, recognized as the best plant to produce green propolis. We offer an entire range of superior quality propolis:

- Extra Green;
- Super Green;
- Green and Brown.

Due to Brazil's great biodiversity, different chemical and biological compositions are found in propolis of distinct region.

PROPOLIS

POWERFUL NATURAL ANTIBIOTIC

CASHEW NUT

IMPORTANT NUTRIENTS FOR A HEALTHY BODY

Cashew nut is rich in good fats for PROVEN BENEFITS the heart and minerals such as magnesium, iron and zinc, which prevent anemia and improve the health of the skin, nails and hair.

In addition to preventing heart problems, the cashew nut also helps in preventing cancer and premature aging due to its antioxidant properties. It should be consumed in small quantities, from 5 to 20 units per day, and can be used in snacks, salads or as an ingredient in other preparations, such as cakes and crackers. Cashew nuts can be found in the form of flour, that can be added to food, fruits and yogurts.

Proven Benefits

- Prevention of heart disease, prevention of cancer and premature aging because it is rich in anti-oxidants and anti-inflammatories such as selenium and vitamin E;
- Improved cholesterol and memory, due to its mono and polyunsaturated fats;
- Reduction of blood pressure, body aches, headache, migraine and muscle fatigue because it is a good source of magnesium;
- Strengthening of the immune system, because it contains zinc;
- Prevention of osteoporosis, because it contains phosphorus that helps in the absorption of calcium and is present in bone composition;
- Prevention and treatment of anemia, because it is rich in iron;
- Maintenance of skin and hair color, because it contains copper.

BRAZILIAN NUT

HIGH CONTENT OF GLUTATHIONE PEROXIDASE, A POWERFUL ANTIOXIDANT

Brazilian nuts are seeds of the same group as walnuts, almonds and other oilseeds. It is rich in good fats, minerals and phytochemicals, having a high nutritional value.

These nuts contain abundant antioxidant substances, especially selenium. A single nut provides almost 100 mcg of selenium, which corresponds to 150% of the recommended daily dose.

Chestnuts have phenolic compounds and flavonoids and are rich in vitamin E, phytosterols and squalene. Its beneficial effects are due to its antioxidant and antiproliferative action, which reduces the risk of atherosclerosis and cancer.

Brazilian nuts are good for the cardiovascular system, helping to lower cholesterol, improve immunity and activate thyroid metabolism.

Proven Benefits

Brazilian nuts are a source of potassium. The benefits of this nutrient range from controlling blood pressure to decreasing the risk of cardiovascular disease, as well as decreasing the excretion of calcium in the urine.

They also contain phosphorus, which is good for the bones.

Due to a good percentage of Omega 9 and glutathione peroxidase, which are powerful antioxidants, the Brazilian nuts offer various health benefits:

- Strengthen the immune system;
- Prevent cardiovascular diseases;
- Anti-cancer action;
- Activate thyroid metabolism

FOOD SUPPLEMENTS

WE PROVIDE SEVERAL PRODUCTS FROM THE AMAZONIAN JUNGLE

Dried leaves and herbs

ART BRAZIL supplies soursop, aloe vera, old cinnamon, aroeira, and other plants used in the composition of cosmetics and medicines.

COPAIBA OIL - 100% natural and pure, with no addition of other elements in its composition. Despite its difficult productivity, copaiba has high market demand worldwide, known and used therapeutically.

Its effectiveness as an antiinflammatory and antibiotic, an antiseptic, expectorant, healing, carminative, laxative, diuretic, antimycotic, vermifuge and antitumor.

CUMARU - Its seeds are widely used by the food, drink and cosmetic industry to develop smelling products, as it has a characteristic aroma that comes close to the smell of vanilla.

ANDIROBA - Anti-inflammatory action, which is enhanced when massaged, relaxing the muscles and relieving muscle pain and inflammation. Can be mixed in shampoos and creams, helping to fight hair loss and baldness.

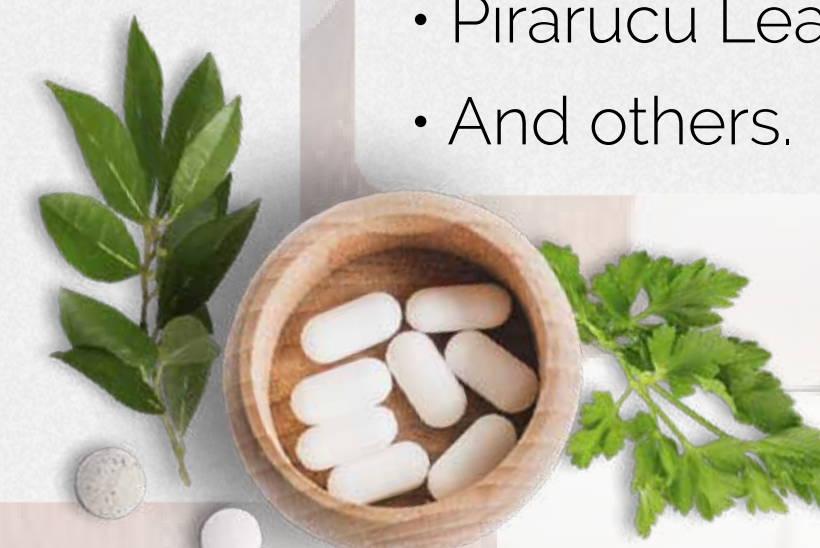

Supplements in capsules

- Medical Oils and Powder
- Garlic Oil
- Copaiba Oil
- Andiroba Oil

RECONHECIDA

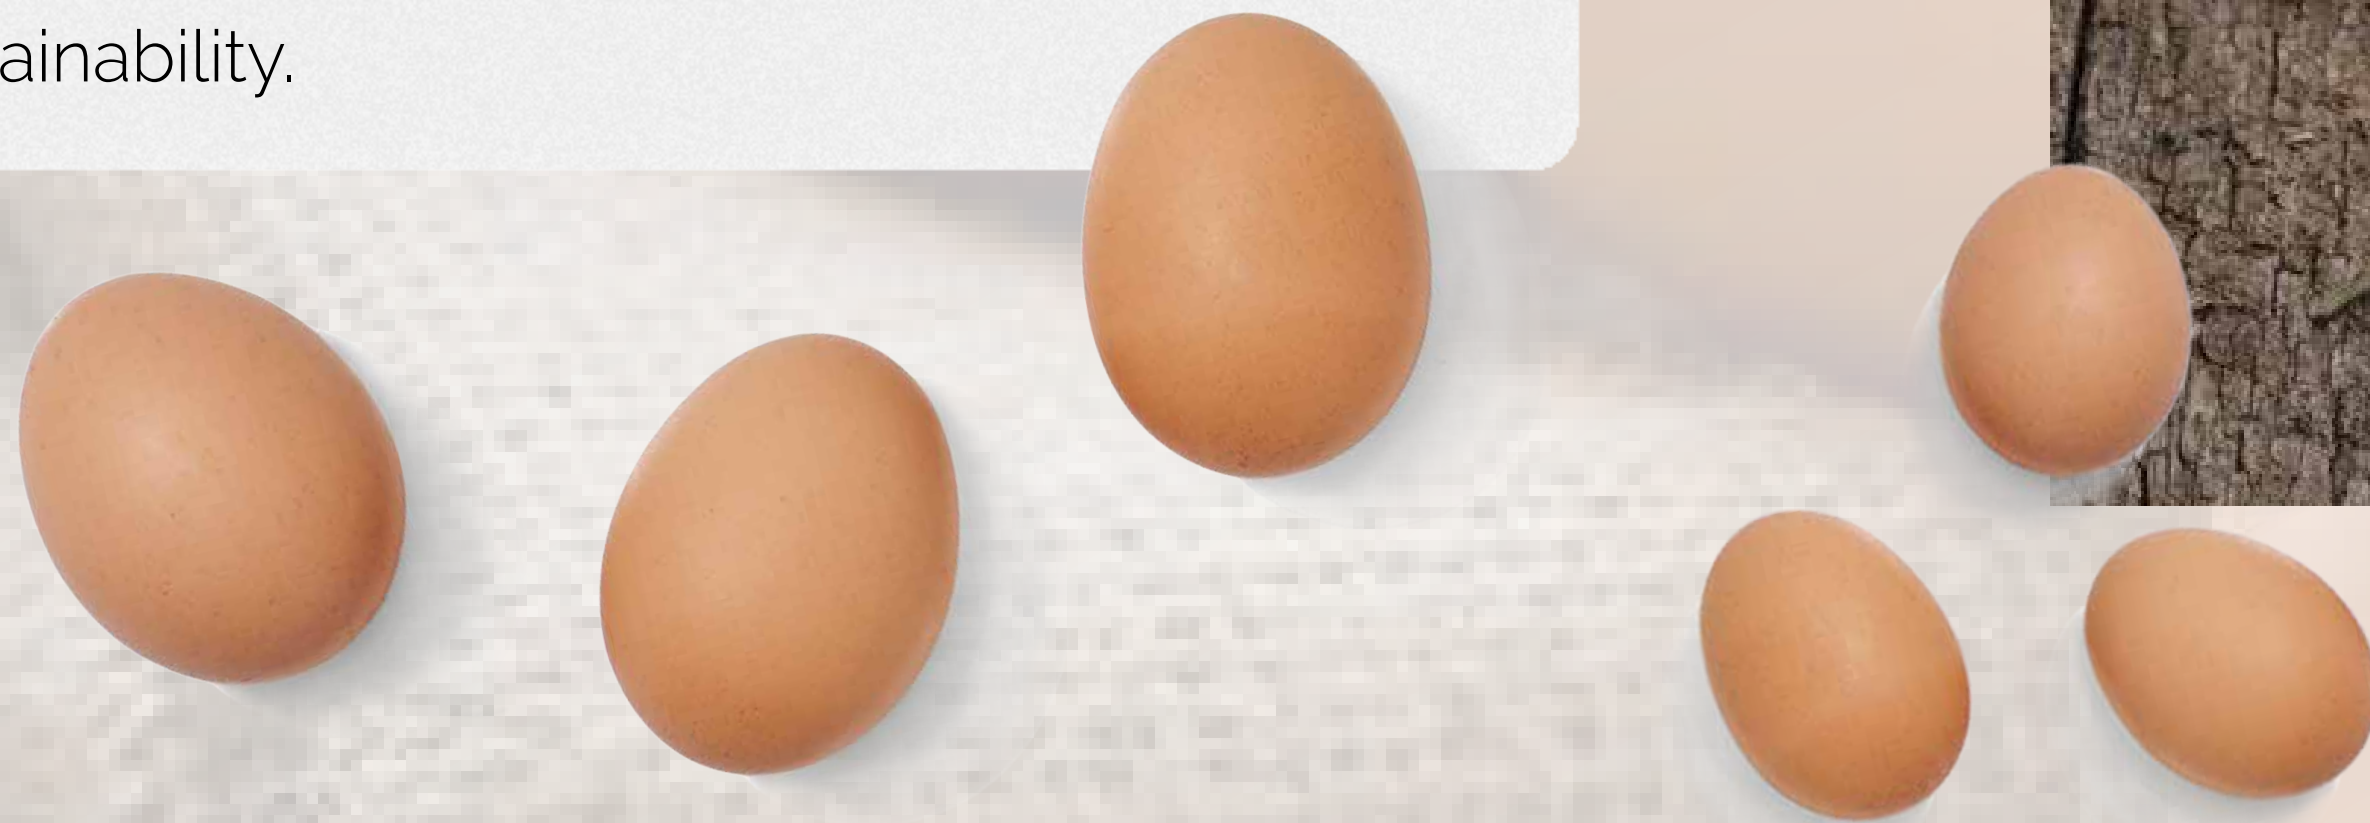

IN BRAZIL AND IN THE WORLD

EGGS

ART BRAZIL OPERATES IN THE POULTRY
MARKET WITH LARGE PRODUCTION

Quality begins at the origin of every process present at the units, concern with biosafety is the priority, advocating punctuality in the confirmation of deliveries and awareness of the importance of sustainability.

BRAZILIAN FISH

AMAZONIAN FISH AND PIRARUCU LEATHER

PIRARUCU FISH

is one of the largest freshwater fish in the world. It can reach 200 kg or more, reaching 2,10 m in height and more than 65 kg.

It is a wild fish from the Amazon and its preservation is fully guaranteed, due to federal and local environmental control bodies, such as IBAMA and IPAAM.

Mostly male pirarucu is fished, the female is generally spared to ensure the reproduction.

QUALITY

Pirarucu is an extremely tasty and healthy fish. It is very popular in major world centers, both for its flesh and by-products. Viscera, scales, heads, all parts of pirarucu is marketed on a large scale.

Art Brazil processes 200.000 tons of diversified fish, per year

- ART BRAZIL is a trusted supplier of freshwater fish of various species. We work with species fished and processed in Manaus - the capital of Amazon State in Brazil. We value transparency the quality of our products.
- All fish are processed, packaged and frozen within the standards of the Ministry of Agriculture and local bodies.
- We ensure the best supply chain to guarantee large quantities for the national and international market.
- Our fish is wild, therefore it does not contain any type of hormone derived from artificial reproduction hormones.
- ART BRAZIL is committed to environmental standards, respecting all reproduction and fishing chain cycles.
- ART BRAZIL collaborates with native river fishing populations, preserving nature and encouraging their sustainable economic activity, by only buying fish during the legal allowed period and paying fair prices.

WOOD

DOORS AND WINDOWS IN HARDWOOD

ART BRAZIL exports different types of Brazilian wood. We are specialized in cut and processed pine wood, that can be delivered in the specific dimensions required by our customers.

ART BRAZIL is a trusted supplier of wood to furniture manufacturers and the packaging industry. We also provide cut pine, eucalyptus and hardwood, for construction and fireplace mantels.

We only sell wood exploited in private isolated forests, by our partners. ART BRAZIL supplies wood domestically and exports it worldwide.

PALLETS

ALUMINUM FRAMES

BEAUTY AND QUALITY GUARANTEE

Discover our entire line of aluminum frames with doors and windows of the highest quality, strength and high standard of finish and beauty, with a modern designer that stands out in all environments.

METALS

COPPER IN THE FORM OF CATHODES FORMED BY ELECTROLYSIS

ART BRAZIL dedicated to the purchase of noble ores, to provide the Brazilian producer, a better opportunity to sell your products and, for buyers abroad, a better possibility of search for the best quality and prices.

Cathodes are fabricated by the electro refining of the copper anodes. Most sales are mainly consumed to produce high-quality copper wire rod, that is later on processed and transformed into copper wire and cables, which final destination is primarily for electrical use.

NIOBIUM - Brazil has 94% of the niobium available on the planet. Niobium's metallic alloys are physiologically inert and hypoallergenic. Therefore, it is used to make medical devices, such as pacemakers, as well as jewelry. Niobium is also widely used to manufacture superconducting magnet wires, used in magnetic resonance machines, for example, or in particle accelerators.

Two also work with:

- Manganese
- Tantalum
- Cassiterite
- Tantalite

SÃO TOME STONE

NOBLE CHARACTERISTICS AND NON-SLIP
TEXTURE

São Tome Stone is a quartzite, which emerges as a trend in the sector of ornamental rocks. This natural stone is athermal and has low water absorption, making it the most suitable material for covering edges and pool areas. Its maintenance is also very simple for deeper cleaning. Natural stones offer a more rustic look and make beautiful compositions with other materials.

The export of ornamental rocks is among the main ones in Brazil, which makes natural material the fifth among ores, second only to iron ore, gold, copper and niobium.

Colors: White, gray, yellow, mixed, greenish, pink

Format: Fillet, mosaic, square/rectangular, shard

Finishing: Natural
